

NFTLeadBot

Problem

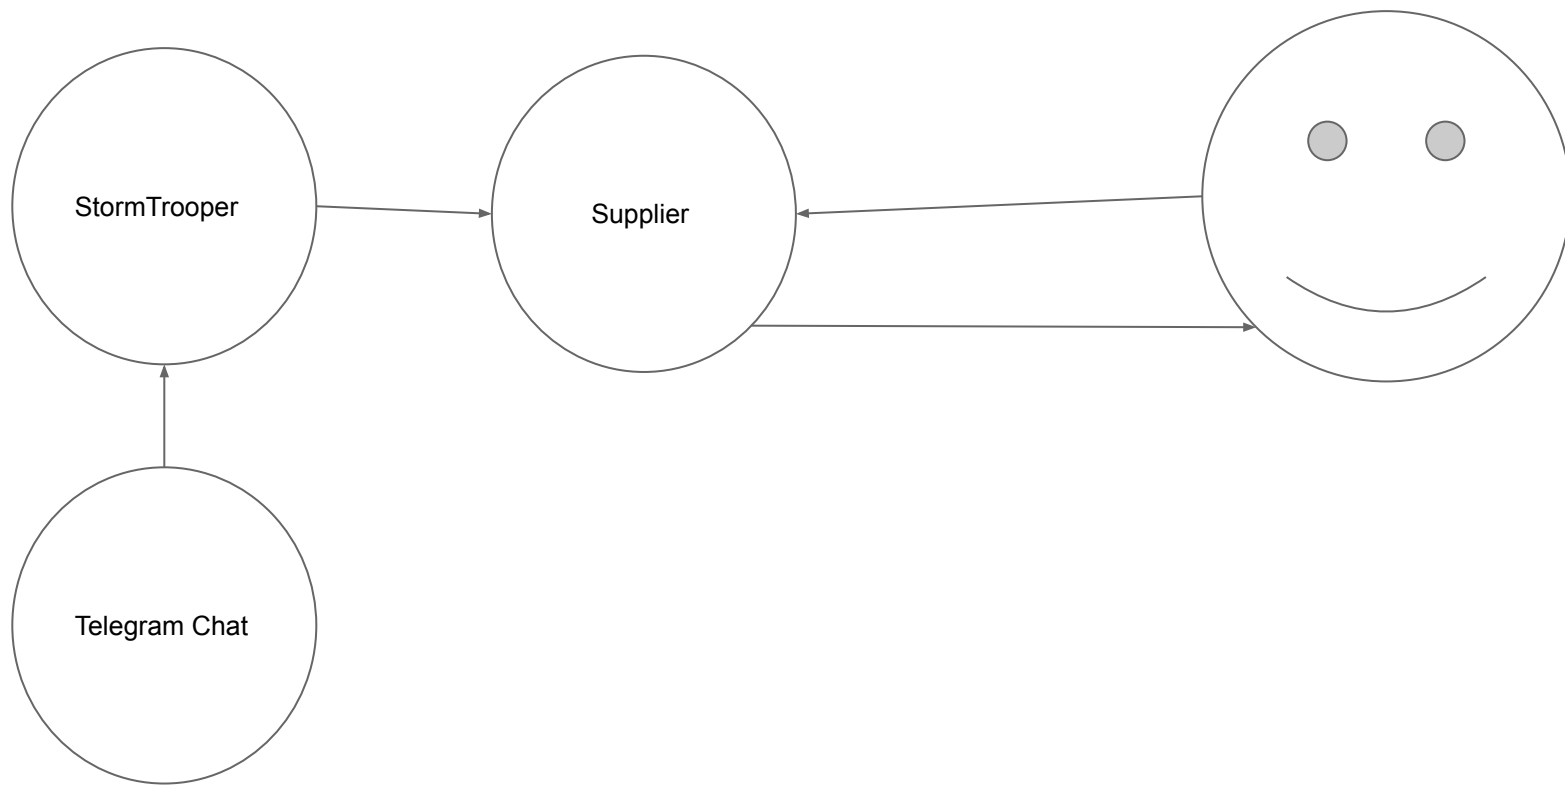

- Modern freelancers have problem with finding potential customers for their service. Either lack of market or inability for customers to finding workers in proper places.

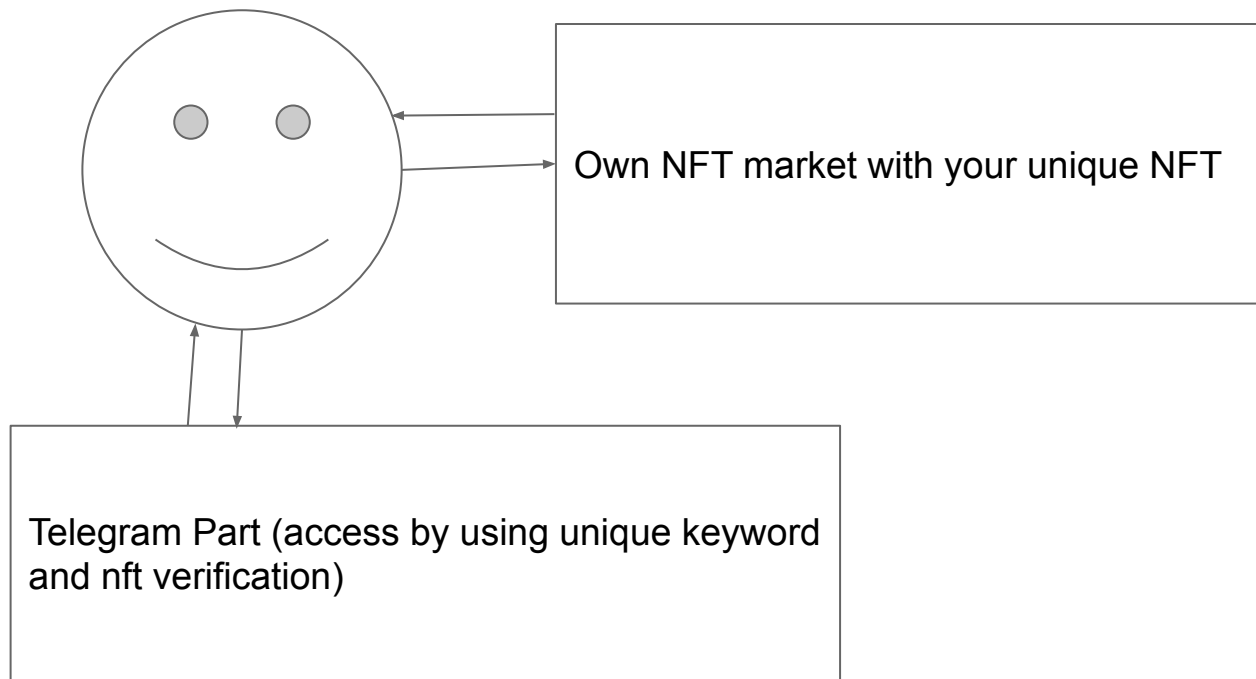

Solution

- We can introduce bot with the ability to find target customers and send information to the freelancer

What important in this work

- By creating proper registration page we can add new extension for aiogram to register people by their nfts using web3 technologies
- This part is foundation for creating new branch for aiogram and adding extra abilities such as payment using web3 technologies and etc.
